

ESOLPK implements Microsoft Dynamics GP (Financial Solution) for Cabinet Division Employees Cooperative Housing Society (CDECHS)

CDECHS brings together fragmented operations to align with their business processes, ensuring quick processing of information.

Company Overview:

Cabinet Division Employees Cooperative Housing Society (CDECHS) covers an area of 4400 Kanals and contains nearly 2800 plots for residence / commercial purposes. This Housing Society is located in the beautiful city of Islamabad, ensuring that its residents should be able to enjoy excellent recreational facilities in a clean environment. These features ensure a prestigious and comfortable lifestyle and provide great potential for investment in the prime real estate.

The Challenge:

CDECHS began to face trouble due to its vast infrastructure. Several issues appeared on the scene such as handling the invoices, payments and keeping the records for a whole community. There were many fragmented operations which were supposed to be aligned with business processes.

ESOLPK's Solution for CDECHS

Microsoft GP Financial Module

ESOLPK's Solution:

To resolve the mentioned issues, CDECHS selected ESOLPK Enterprise Services Division. ESOLPK carried out the implementation of Microsoft Dynamics GP 10.0 for Financial Management of CDECHS.

The main scope for Microsoft GP implementation included:

- Chart of Account
- General Ledger Management
- Members Ledger Management
- Plots Record Management
- Receivables Management
- Trial Balance
- Balance Sheet
- Data Entry for about 4000 Existing Records.

Technologies Used:

- Windows 2003 Server
- Microsoft Dynamics GP 10.0
- MS SQL Server 2005
- MS Office 2007

The implemented solution helped CDECHS in bringing together fragmented operations, ensuring quick processing of information, thereby reducing cost and improving quality and ROI.

Customer Benefit:

ESOLPK has played a significant part in the automation of CDECHS entire financial system, resulting in quick processing of information and swift management of daily financial transactions. The automation of daily operations of Account Management, General Ledger/Members Ledger, Plots Record Management and Receivables Management and most significantly the record keeping of data of past 2 decades which was a real trouble was efficiently managed without any further hassle.

ESOLPK's vast expertise in Microsoft GP enabled CDECHS staff to easily share information, increase productivity, and provided a transparent environment. The frustrated environment in office changed to a positive one due to this automation operation. Moreover, company highly recommend ESOLPK on the basis of skills, devotion, reliability, follow-up and outstanding competence.
